Election/Restrictions

This application contains claims directed to the following patentably distinct species:

Species 1: Claims 1-19, 30-49, 66-84 (drawn to method, system and computer-readable medium for energy trading, classified in class 705, subclass 37).

Species 2: Claims 20-29, 50-65 and 85-94 (drawn to method, system and computer-readable medium for controlling operation of electrical power generation or distribution system, classified in class 700, subclass 286).

The species are independent or distinct because Species 2 has utility separate from that of Species 1 such as controlling operation of electrical power generation or distribution system. Because these species are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, or patentability requirements, restriction for examination purposes as indicated is proper.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 30 and 66 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 3628

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
